Name: Muhammad Safi (2303.khi.deg.023)

Assignment Partner: Huzaifa Ali (2303.khi.deg.016)

1. First, we configured the create_kafka_topic.sh file so that it creates topics and presents a list of all topics after creating.

```
4.2_assignment > playing_with_kafka > $ create_kafka_topic.sh
  1   #!/bin/bash
  2
  3
  4   # Commands to create topics
  5
  6   docker-compose exec broker kafka-topics --create --topic events_initial --bootstrap-server broker:9092
  7   docker-compose exec broker kafka-topics --create --topic events_urgent --bootstrap-server broker:9092
  8   docker-compose exec broker kafka-topics --create --topic events_consumer --bootstrap-server broker:9092 --partitions 4
  9   # /////////////////
 10
 11
 12   # Commmand to list all Topics
 13   docker-compose exec broker kafka-topics --bootstrap-server broker:9092 --list
 14   |
```

2. Running Docker compose.

```
Stopping zookeeper   ... done
(base) muhammadsafi@all-MS-7D35:~/Desktop/assignment_repo/tasks/4.2_assignment/playing_with_kafka$ docker-compose up -d
/snap/docker/2746/lib/python3.6/site-packages/paramiko/transport.py:32: CryptographyDeprecationWarning: Python 3.6 is no longer supported by the Python core team. Therefore, support for it is d
eprecated in cryptography. The next release of cryptography (40.0) will be the last to support Python 3.6.
  from cryptography.hazmat.backends import default_backend
Starting zookeeper ... done
Starting broker    ... done
```

3. Running create_kafka_topic.sh to run the script and display the list of all created topics.

```
(base) muhammadsafi@all-MS-7D35:~/Desktop/assignment_repo/tasks/4.2_assignment/playing_with_kafka$ ./create_kafka_topic.sh
/snap/docker/2746/lib/python3.6/site-packages/paramiko/transport.py:32: CryptographyDeprecationWarning: Python 3.6 is no longer supported by the Python core team. Therefore, support for it is d
eprecated in cryptography. The next release of cryptography (40.0) will be the last to support Python 3.6.
  from cryptography.hazmat.backends import default_backend
WARNING: Due to limitations in metric names, topics with a period ('.') or underscore ('_') could collide. To avoid issues it is best to use either, but not both.
Created topic events_initial.
/snap/docker/2746/lib/python3.6/site-packages/paramiko/transport.py:32: CryptographyDeprecationWarning: Python 3.6 is no longer supported by the Python core team. Therefore, support for it is d
eprecated in cryptography. The next release of cryptography (40.0) will be the last to support Python 3.6.
  from cryptography.hazmat.backends import default_backend
WARNING: Due to limitations in metric names, topics with a period ('.') or underscore ('_') could collide. To avoid issues it is best to use either, but not both.
Created topic events_urgent.
/snap/docker/2746/lib/python3.6/site-packages/paramiko/transport.py:32: CryptographyDeprecationWarning: Python 3.6 is no longer supported by the Python core team. Therefore, support for it is d
eprecated in cryptography. The next release of cryptography (40.0) will be the last to support Python 3.6.
  from cryptography.hazmat.backends import default_backend
WARNING: Due to limitations in metric names, topics with a period ('.') or underscore ('_') could collide. To avoid issues it is best to use either, but not both.
Created topic events_consumer.
/snap/docker/2746/lib/python3.6/site-packages/paramiko/transport.py:32: CryptographyDeprecationWarning: Python 3.6 is no longer supported by the Python core team. Therefore, support for it is d
eprecated in cryptography. The next release of cryptography (40.0) will be the last to support Python 3.6.
  from cryptography.hazmat.backends import default_backend
events_consumer
events_initial
events_urgent
```

4. Running the –describe command to inspect the partitions in events_consumer topic.

```
See snap info <snapname> for additional versions.
(base) muhammadsafi@all-MS-7D35:~/Desktop/assignment_repo/tasks/4.2_assignment/playing_with_kafka$ docker-compose exec broker kafka-topics --bootstrap-server localhost:9092 --topic events_consu
mer --describe
/snap/docker/2746/lib/python3.6/site-packages/paramiko/transport.py:32: CryptographyDeprecationWarning: Python 3.6 is no longer supported by the Python core team. Therefore, support for it is d
eprecated in cryptography. The next release of cryptography (40.0) will be the last to support Python 3.6.
